

An acne medication with the power to please you.

New Acanya™ Gel goes on smoothly and disappears quickly. Plus, the water-based gel is designed specifically to help minimize skin irritation. Acanya Gel is a prescription medication that starts working fast. In clinical studies, patients using Acanya Gel reported significant improvement as soon as 2 weeks.

Important Safety Information: Side effects may include redness, scaling, itching, burning, and stinging. Do not use Acanya Gel if you are allergic to clindamycin, or if you have a history of inflammation of the colon (colitis). Clindamycin, the antibiotic in Acanya Gel, may cause diarrhea. If you experience diarrhea, stop using Acanya Gel immediately and contact your doctor. Avoid using tanning beds or sun lamps, and limit your time in sunlight after applying Acanya Gel.

Before using Acanya Gel, please read the patient information and instructions for applying.

Talk to your doctor immediately about any side effect that bothers you or that does not go away. To learn more about Acanya Gel, visit www.AcanyaGel.com.

Please see accompanying full prescribing information and patient information for full instructions for use.

that's made to be loved*

NEW Acanya Gel
(Clindamycin Phosphate 1.2%
and Benzoyl Peroxide 2.5%)

Power to please

*The power to treat your acne
without overpowering your skin*

NEW Acanya Gel
(Clindamycin Phosphate 1.2%
and Benzoyl Peroxide 2.5%)

Power to please

The once-daily, topical treatment for acne vulgaris
in patients 12 years of age or older

Proven to work

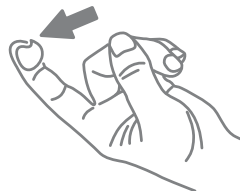

Acne is caused by several factors. Acanya™
Gel combines 2 powerful medications that
work in different ways to help you achieve
results you'll love.

In clinical studies, Acanya Gel was proven
to treat blackheads, whiteheads, and
inflamed acne on the face.

Easy to use

- Wash your face gently and pat skin dry.
- Take ONE pea-sized amount of Acanya Gel
and dot it onto your chin, both cheeks,
nose, and forehead. Spread the dots of
gel over your face and gently rub it in.
- Do not get Acanya Gel in your mouth, eyes,
or nose, or on your lips.
- Wash your hands with soap and water.

Benzoyl peroxide may bleach colored fabrics
or clothes. After applying, let Acanya Gel dry
completely before dressing or going to bed.

Gentle to skin

- Acanya Gel contains no alcohol or detergents, which may cause
stinging or burning.
- May be used under makeup and sunscreen.
- Fragrance-free Acanya Gel goes on smoothly, disappears quickly,
and leaves no residue.

Please note:

- Protect Acanya Gel-treated skin from sunlight by using an SPF 15
or higher sunscreen. Avoid tanning beds and sun lamps.
- Don't wash your face more than 2 to 3 times a day, and avoid
scrubbing your skin—it may make your acne worse.
